PROFILE

IT support professional with two years of hands-on help desk experience supporting students, faculty, and staff with Windows/macOS, Microsoft 365, hardware, software, and account access issues. B.S. in Information Technology. Strong at explaining technical problems to non-technical users and at creating end-user training materials. Seeking an IT Support role in a customer-focused enterprise environment.

PROFESSIONAL EXPERIENCE

IT Support Technician | IT Support Center, BJU Inc. | Greenville, SC July 2024 – May 2026

- Provided front-line help desk support to students, faculty, and staff, troubleshooting hardware, software, login, and Microsoft 365 and Canvas issues.
- Resolved account access problems, restoring users' access to academic platforms and university systems.
- Documented technical problems and their solutions in our TDX ticketing system to speed up future troubleshooting and keep service consistent across the team.
- Explained technical issues and walked users through fixes at their own level of experience, from first-year students to faculty and staff.

EDUCATION

Bob Jones University | Greenville, SC May 2026
Bachelor of Science in Information Technology
Honors: Dean's List (Fall 2023, Fall 2024, Spring 2025, Fall 2025, Spring 2026)

CERTIFICATIONS

- **CompTIA A+ -** in progress, exam expected November 2026
- **Microsoft Office Specialist (MOS) -** 2025

TECHNICAL SKILLS

IT Support: Hardware and software troubleshooting, account access and login issues, end-user training, technical documentation, help desk customer service
Operating Systems: Windows 10/11, macOS, Linux
Applications: Microsoft 365, Microsoft Office, Canvas LMS
Additional: C++, HTML, Active Directory, JavaScript, MySQL, database design (ERD)

PROJECTS

Phishing Awareness Training Manual | Academic Training Project 2026

- Designed an end-user training manual that teaches university students to recognize phishing attacks and report suspicious emails to IT.
- Wrote learning objectives, training content, and step-by-step reporting procedures, plus survey questions to measure user understanding.

Worship Service Database Project | Academic Project 2023

- Designed a relational database and ERD to plan worship services, assign personnel, and organize song selections.
